

FCC

To whom it may concern,

I do pay for the XM service and I do not think any NAB protest is warranted or valid. I enjoy the XM programming including the travel conditions and weather info for the local markets. The local radio stations do not provide the timely and complete information that can be provided by the XM service.

Please reject petition 04-160.

I will be contacting my appropriate contact in the Congress as well on this matter.

Respectfully,
